

## Special Issue

# Breast Cancer and Pregnancy: Clinical, Translational, and Psychosocial Perspectives

### Message from the Guest Editors

Breast cancer in the context of pregnancy is a rare but increasingly recognized scenario that poses unique diagnostic, therapeutic, and psychosocial challenges. Traditionally, the term pregnancy-associated breast cancer encompassed all cases diagnosed during gestation or within 12 months after delivery. However, growing evidence indicates that breast cancers diagnosed in the years following childbirth have distinct biological features and prognoses.

This Special Issue will explore the complex interplay between breast cancer and pregnancy in all its forms. For this Special Issue, original research articles, reviews, and systematic reviews are welcome. Topics may include (but are not limited to) clinical management during pregnancy and postpartum; systemic, surgical, and radiologic strategies; maternal and fetal outcomes; pregnancy after breast cancer; fertility preservation and oncofertility; high-risk genetic mutations; epidemiology and risk factors; biological mechanisms; and ethical, psychosocial, and public health perspectives. We look forward to receiving your contributions.

## About the Journal

### Message from the Editor-in-Chief

*Cancers* (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
