Implementation of Physical Activity Promotion in Cancer Care (2nd Edition)

Message from the Guest Editor

Exercise oncology is a growing field, with a wealth of research demonstrating the importance of regular physical activity for a healthy survivorship trajectory. Despite the strong evidence base supporting exercise against cancer, physical activity promotion within cancer care settings and the scale-up of exercise interventions are limited. The purpose of this Special Issue is to (i) facilitate our understanding of the barriers to physical activity promotion in cancer care; (ii) identify solutions for the implementation of physical activity promotion to those living with and beyond cancer; and (iii) provide examples of effective implementation of exercise interventions in routine cancer care. We are pleased to invite you to contribute to this Special Issue of *Cancers* concerning the implementation of physical activity in cancer care with a focus on the translation of research evidence into practice, consistent with the ethos of the journal. This Special Issue is the second edition of a previous Issue, titled “Implementation of Physical Activity Promotion in Cancer Care” (https://www.mdpi.com/journal/cancers/special_issues/Y2N83BY6H9).

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
