

# Special Issue

## Symptom Management in Cancer Care

### Message from the Guest Editors

This Special Issue of *Cancers*, titled “**Symptom Management in Cancer Care**,” aims to showcase current research and emerging clinical insights that improve symptom assessment and intervention. We invite submissions of original studies, clinical trials, translational research, implementation science, and comprehensive reviews focused on understanding symptom mechanisms, optimizing supportive care, and integrating symptom management into routine oncology practice. By bringing together diverse perspectives, this Special Issue seeks to promote more proactive, personalized, and patient-centered approaches that enhance the lived experience of people with cancer.

This Special Issue will cover, but is not limited to, the following key areas that have transformed the field over the past five years:

**Impact of symptom burden on patients and their families**

**Multi-symptom assessment and management (such as symptom clusters)**

**Patient-centered empowerment strategies for symptom management**

**Digital health and technology-enabled care**

**Evidence-based symptom interventions**

Palliative and supportive care integration

Survivorship and long-term symptom management

---

## About the Journal

### Message from the Editor-in-Chief

*Cancers* (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.
