Recent Updates on Imaging and Staging of Gynecologic Cancers

Message from the Guest Editors

Endometrial cancer is one of the few forms of cancer that is increasing in incidence and mortality. This year, it is estimated that the mortality from endometrial cancer will exceed that from ovarian cancer. In order to treat this disease more effectively, we must have better imaging and a better understanding of its prognostic features. These features include molecular features that are responsible for the prognosis and, hence, spread of the disease. The management of endometrial cancer has evolved dramatically as we understand its spread better. This includes anatomic staging and molecular staging with associated imaging. New technologies and molecular features are evolving continuously. We encourage you to submit to this Special Issue on these specific topics of imaging and features, both molecular and anatomic, that could lead to a better understanding of endometrial cancer. Prof. Dr. David Mutch

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
