

## Special Issue

# Current Challenges in Geriatric Oncology

### Message from the Guest Editors

The majority of cancers are diagnosed in the older adult population, which is expanding globally. Unfortunately, older adults with cancer are often under-served in their clinical care and under-represented in research studies. On the other hand, there is emerging evidence suggesting that tumour biology and the specific needs of individuals in this population are different from those of their younger counterparts. Furthermore, treatment goals may be different given the increased incidence of co-morbidities leading to deaths from competing causes. In this Anniversary Issue, we invite submissions of original research articles and narrated or systematic reviews looking at all fields of interest in relation to the care of older adults with cancer, with a focus on the challenges encountered, and how they may be overcome. We especially welcome manuscripts authored by more than one discipline involved in the clinical care and/or research in geriatric oncology.

### Guest Editors

Prof. Dr. Kwok-Leung Cheung

School of Medicine, University of Nottingham, Derby DE22 3DT, UK

Dr. Holly M. Holmes

Division of Geriatric and Palliative Medicine, McGovern Medical School, University of Texas Health Science Center at Houston, Houston, TX, USA

### Deadline for manuscript submissions

closed (15 March 2024)

## About the Journal

### Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
