Special Issue

Unveiling the Complexity of Hepato-Biliary-Pancreatic Cancers: From Pathogenesis to Management

Message from the Guest Editors

We are pleased to invite you to contribute to a Special Issue of Cancers titled "Unveiling the Complexity of Hepato-Biliary-Pancreatic Cancers: From Pathogenesis to Management." Hepatocellular carcinoma, cholangiocarcinoma, and pancreatic ductal adenocarcinoma remain among the most lethal and therapeutically challenging malignancies worldwide. This Special Issue aims to shed light on the multifaceted biology, molecular mechanisms, and therapeutic advances shaping the diagnosis, prognosis, and treatment of these cancers.

We welcome original research articles, reviews, and communications that address topics including tumour microenvironment, biomarkers, treatment resistance, immunotherapy, early detection strategies, and novel therapeutic approaches.

Your expertise would be a valuable addition to this Special Issue, and we believe your contributions can help advance the understanding in this critical area of oncology. Submissions will undergo rigorous peer review and benefit from the high visibility and rapid dissemination provided by Cancers.

We look forward to your participation in this exciting endeavour.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok.

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
