

## Special Issue

# Blood Stem Cell and Hematological Malignancies

### Message from the Guest Editor

In this Special Issue, we are pleased to invite you to contribute your latest findings, share exciting novel insights, and summarize the current research of your field of research. This Special Issue aims to highlight recent research advances in hematopoietic stem cell biology, including their role in hematological malignancies, clonal hematopoiesis, myelodysplastic syndromes, and the part played by cell-intrinsic vs. cell-extrinsic factors in disease progression. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following areas:

Hematopoietic stem cells;  
Clonal hematopoiesis;  
Hematological malignancies;  
Bone marrow failures;  
Translational research.

## About the Journal

### Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
