Rare Tumors in Children: Trends in Diagnosis, Treatment and Prevention

Message from the Guest Editor

Rare cancers constitute a heterogeneous family of pathologies that can affect almost any part of the body. Rare cancers are associated with a series of challenges and issues related to their status as rare diseases. The difficulties involve both the patient's diagnostic and therapeutic pathway and the impact on the efficiency of national healthcare systems. However, in recent years these rare diseases have attracted more attention, and a number of collaborative groups on rare cancers have been established with the aim of fostering the circulation and exchange of useful information in both the diagnostic and therapeutic phases. These observations confirm that young patients with rare tumors need specific diagnostic and therapeutic approaches, and represent a real challenge for the scientific world of pediatric oncology. This Special Issue will highlight the current state of the art and trends in the diagnosis, treatment, and prevention of rare tumors in children. In this Special Issue, original research articles and reviews are welcome. I look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
