

Special Issue

Regulatory T Cells in Tumor Environment

Message from the Guest Editor

Regulatory T cells (Tregs), an immunosuppressive subset of CD4+ T cells characterized by the master transcription factor FoxP3, play essential roles in maintaining self-tolerance. This Special Issue is expected to assemble studies analyzing the prognosis value of Tregs, the mechanisms involved in their recruitment and expansion in the tumor environment, their localization and residency, as well as their heterogeneity (transcriptome, phenotype, activation/exhaustion, function, origin (natural/induced)).

Guest Editor

Dr. Christine Ménétrier-Caux

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
