

Special Issue

Cancer and Diabetes: What Connections Lie between Them?

Message from the Guest Editors

Cancers and diabetes are widely spread diseases in Western countries, also due to the aging of the population. Therefore, it is not uncommon for a patient to suffer from both conditions. The presence of diabetes in a patient suffering from cancer can adversely affect her/his prognosis. Similarly, several cancer treatments and supportive therapies can exert unfavorable effects on glucose and lipid metabolism, uncovering secondary diabetes in predisposed subjects, worsening the glucose control of people with known diabetes, or further increasing their cardiovascular risk. Many aspects concerning the relationship between these two diseases are still unknown, and there is still a lot of room in this area for basic research. The goal of this special issue is to evaluate the existing knowledge on the relationship between these two conditions. This special issue that will include topics relevant to diabetologists, oncologists, hematologists, epidemiologists, dietologists, palliativists and other clinicians, as well as to researchers and general practitioners.

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
