Pathology of Gynecologic Cancer

Message from the Guest Editors

Gynecologic-associated cancers are a huge burden on families and society that affect women of reproductive age in the modern world. In the meantime, it is necessary to quickly develop effective screening methods, diagnoses, and proper treatment as well as care strategies to preserve the fertility of women with gynecologic cancer. New biomarkers are not only prognostic and predictive, but often have an extended diagnostic use as well. This Special Issue wants to address biomarkers in both tumors and their microenvironments, detected by either routine immunohistochemical tools or by the innovative implementation of artificial intelligence and machine learning in pathology diagnoses. The identification of these novel biomarkers and techniques enables the pathologist to play an active role in multidisciplinary decision making to support gynecological oncologists in choosing the best treatments for their patients. The aim of this Special Issue is to focus on publishing high-quality works that are related to the pathology of gynecologic oncology and its diagnosis, treatment, care, and related diagnostic as well as therapeutic strategies.

Guest Editors

Prof. Dr. Koen K.B.T. Van de Vijver

Department of Pathology, Ghent University Hospital, 9000 Ghent, Belgium

Dr. Christianne Lok

Department of Gynaecologic Oncology, Center Gynaecologic Oncology Amsterdam, Location Antoni van Leeuwenhoek - The Netherlands Cancer Institute, Amsterdam, The Netherlands

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
