

## Special Issue

# Single-Cell Data Science (SCDS)

### Message from the Guest Editor

Single-cell sequencing technologies have greatly enhanced our ability to characterize heterogeneous tumor and normal cell populations to understand biological processes and identify novel therapeutic targets. Computational tools have been developed in recent years; however, analysis of single-cell sequencing data remains challenging and time-consuming, especially when integrating multiple types of data. This Special Issue of *Cancers* is devoted to papers and reviews on the latest advances and unprecedented opportunities in single-cell data science. We invite manuscripts from authors who are interested in developing novel tools, methods, and resources, as well as those who have new insights and applications to share in this area.

### Guest Editor

Dr. Jason Roszik

Department of Melanoma Medical Oncology, Division of Cancer Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX, USA

### Deadline for manuscript submissions

closed (15 September 2022)

## About the Journal

### Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

---

### Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
