

Special Issue

Skin Cancer: Epidemiology, Prevention and Quality of Life

Message from the Guest Editor

Cutaneous malignancy is the most common human cancer. Its incidence has been steadily increasing over the past four decades, becoming a public health burden in terms of morbidity and cost. This rising trend is associated with changing environmental exposures and the increased longevity of the general and the immunosuppressed population. This Special Issue will focus on the epidemiology, prevention, and impairment of quality of life due to skin cancer, primarily by addressing the following issues:

- Differential features of skin cancer in special groups: the elderly, children, the immunosuppressed and pregnancy.
- The impact of new therapies for skin cancer on quality of life, specifically the differences in the cosmetic and functional outcome of patients treated with Mohs micrographic surgery compared to conventional surgery.
- The prevention and follow-up of skin tumours in genodermatoses with risk of malignancy.
- The risk and prevention of skin cancer in dermatological therapies.
- The prevention of new melanomas in patients with melanoma.

We warmly welcome submissions, including original papers and systematic reviews.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
