

## Special Issue

# Molecular Mechanisms of Skin Cancer

### Message from the Guest Editor

This Special Issue will highlight novel research focused on the molecular genetics of skin cancer, including melanoma, basal cell cancer, squamous cell cancer, and Merkel cell carcinoma. We welcome research articles and reviews analyzing any molecular aspect of skin cancer pathogenesis, including somatic and/or germline aspects, single-cell sequencing, molecular analysis, clinical prognostic factors, biomarkers of risk, prognosis, and response, and novel pathway-based therapies.

## About the Journal

### Message from the Editor-in-Chief

*Cancers* (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

---

### Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
