

## Special Issue

# Strategies for Isolation and Phenotypic, Genetic, and Functional Characterization of Circulating Tumor Cells

### Message from the Guest Editor

The liquid biopsy (LB) is currently the Rosetta Stone of precision medicine (PM) and one of the principal components of the LB are the circulating tumor cells. The enormous interest aroused by study of CTCs have promoted important advances in their biological knowledge, focused both phenotypic, genetic and functional changes experimented by these CTCs. Importantly, that the increase of biological knowledge of these CTCs is accompanied by the technological advances. This Special Issue addresses the more updated methods and methodologies in the biological and functional characterization of CTCs.

## About the Journal

### Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
