

## Special Issue

# Symptoms and Side Effects in Cancer Survivors

### Message from the Guest Editors

There are an estimated 20 million cancer survivors in 2020, most of whom were diagnosed and treated for breast, prostate, and colon cancer. There are common symptoms and side-effects, and these include osteoporosis, peripheral neuropathy, cardiotoxicity, sexual dysfunction, and psychosocial concerns. We plan an issue devoted to these symptoms and side-effects.

## About the Journal

### Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.
