Symptoms and Side Effects in Cancer Survivors

Message from the Guest Editors

There are an estimated 20 million cancer survivors in 2020, most of whom were diagnosed and treated for breast, prostate, and colon cancer. There are common symptoms and side-effects, and these include osteoporosis, peripheral neuropathy, cardiotoxicity, sexual dysfunction, and psychosocial concerns. We plan an issue devoted to these symptoms and side-effects.

Guest Editors

Prof. Dr. Charles L. Shapiro

Hematology and Medical Oncology, Icahn School of Medicine and the Tisch Cancer Institute at Mt Sinai, 1470 Madison Ave, New York, NY 10029, USA

Dr. Maryam Lustberg

Division of Medical Oncology, The Ohio State University, Columbus, OH 43210, USA

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.
