

## Special Issue

# Cancers in Chronic HIV Infection

### Message from the Guest Editor

The efficacy of HAART have transformed HIV infection into a chronic disease, leading to a pathomorphosis of the clinical manifestations. While the burden of AIDS-defining cancers has reduced substantially, the non-AIDS-defining cancers has increased, now accounting for a large proportion of cancer-related morbidity and mortality in persons living with HIV (PLWH). The aim of this Special Issue is to refocus the attention of healthcare providers, going beyond the undetectable viral load, on the evolving oncologic complications in successfully treated PLWH in support of proactive screening and preventive strategies. In this Special Issue of *Cancers*, we welcome original research articles or comprehensive reviews focusing on cancer risk, types of malignancies, pathogenesis, barriers in diagnosing, treatment disparities, treatment outcomes, and preventive strategies. We look forward to your submissions.

## About the Journal

### Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
