Cancers in Chronic HIV Infection

Message from the Guest Editor

The efficacy of HAART have transformed HIV infection into a chronic disease, leading to a pathomorphosis of the clinical manifestations. While the burden of AIDS-defining cancers has reduced substantially, the non-AIDS-defining cancers has increased, now accounting for a large proportion of cancer-related morbidity and mortality in persons living with HIV (PLWH). The aim of this Special Issue is to refocus the attention of healthcare providers, going beyond the undetectable viral load, on the evolving oncologic complications in successfully treated PLWH in support of proactive screening and preventive strategies. In this Special Issue of *Cancers*, we welcome original research articles or comprehensive reviews focusing on cancer risk, types of malignancies, pathogenesis, barriers in diagnosing, treatment disparities, treatment outcomes, and preventive strategies. We look forward to your submissions.

Guest Editor

Dr. Diego Ripamonti

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
