Advances in Thyroid Cancer

Message from the Guest Editors

The incidence of thyroid cancers has seen a significant increase in the world in the last decades, with a great impact on public health. At same time, advances in thyroid cancer management have resulted in substantial changes in the perspectives of patients affected by this pathology. The scientific community is constantly involved in updating guidelines and characterizing new therapeutic strategies, with an important reflection on clinical practice. With respect to this point of view, the significance of the topic and the social repercussions it demonstrates have moved our interest towards this Special Issue with the aim of providing the reader with an overview of new approaches to thyroid cancer.

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
