

# Special Issue

## Thoracic Cancers

### Message from the Guest Editor

The whirlwind progress we have recently witnessed in the management of thoracic cancers continues at a rapid pace, with continued improvement in patient outcomes with the integration of expanded molecular testing, immune biomarker testing, ctDNA analytics, and the expansion of targeted and immunotherapeutic treatment options now moving into early-stage settings calling for novel trial designs and biomarker endpoints. This fast-paced progress inspired us to call for this Special Issue in *Cancers*, where we invite you to submit your work including original research, expert reviews, and commentaries on this key subject informing patient care.

## About the Journal

### Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
