

## Special Issue

# miRNAs in Targeted Cancer Therapy

### Message from the Guest Editor

miRNAs play important roles also in regulating and predicting resistance to cancer therapy. Moreover, the pleiotropic nature of miRNAs allows them to influence multiple genes and pathways simultaneously, offering a unique advantage over traditional single-target therapies, such as miRNA-based combination therapies alongside chemotherapeutic drugs, which have shown synergistic effects, overcoming drug resistance and reducing side effects. We are pleased to invite you to contribute to this Special Issue, aiming to highlight the roles of miRNAs specifically for cancer therapy. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: the role of miRNAs in cancer therapy, delivery of miRNAs for cancer therapy, mechanisms of miRNA therapeutics for any cancer type. I look forward to receiving your contributions.

### Guest Editor

Dr. Mustafa Özen

## About the Journal

### Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
