Advances in Spine Oncology: Research and Clinical Studies

Message from the Guest Editor

Spine oncology is a rapidly advancing and evolving field, with ongoing integration of enabling technologies and cutting-edge translational work to improve outcomes for this fragile patient population. Primary and metastatic tumors of the spinal column are complex entities with innumerable nuances that make diagnosis and treatment a challenge. In this Special Issue, we hope to highlight some of the advances that have improved the treatment for these patients. This Special Issue aims to improve our ability to diagnose and treat primary and secondary tumors of the spinal column. We hope that it will highlight novel and unique treatment paradigms that will be applied to patients across the globe. Original research articles and reviews are welcome for this Special Issue. Research areas may include, but are not limited to, the following: advances in imaging and radiotherapy for spinal tumors; surgical techniques for resection of spinal tumors; targeted therapy for spinal tumors; and novel technologies for the diagnosis and treatment of spinal tumors. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
