Updates in Neuroendocrine Neoplasms

Message from the Guest Editor

The treatment landscape of neuroendocrine neoplasms continues to evolve with novel targeted drugs, radioligands, and immune therapies. This Special Issue aims to explore the role of chemotherapy, liver-directed treatment, targeted therapy, immune therapy, and peptide receptor radionuclide therapy, as well as the interaction between these treatments. The implications of new molecular findings will also be explored in this Special Issue.

Guest Editor

Dr. Jonathan Strosberg

Department of GI Oncology, Moffitt Cancer Center and Research Institute, Tampa, FL, USA

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
