## Surgical Treatment of Endocrine Cancer

### Message from the Guest Editor

Neuroendocrine tumors (NETs) are rare neoplasms. They arise from cells of the diffuse endocrine system, which are mainly dispersed throughout the body. While most NETs are sporadic, some are associated with genetic syndromes. Furthermore, some NETs are 'functioning' when there is clinical hypersecretion of metabolically active peptides, whereas others are 'nonfunctioning'. Management requires a multidisciplinary discussion between the oncologist, radiologist, pathologist, and surgeon. Surgery is the main treatment in curative intent for neuroendocrine tumors (NETs). In this Special Issue, we will discuss, through reviews/meta-analyses and original articles, which types of surgery may be proposed and in which way the preparation for surgery will take place. Follow-up of such management will also be analyzed.

### **About the Journal**

### Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

#### Editor-in-Chief

Prof. Dr. Samuel C. Mok.

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

#### **Author Benefits**

### **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.
