

## Special Issue

# Advances in Primary and Secondary Bone and Soft Tissue Tumors

### Message from the Guest Editor

This Special Issue aims to highlight recent advances in the understanding, diagnosis, and treatment of bone and soft tissue tumors, including both primary and metastatic disease. We invite contributions covering basic (laboratory-based) science, translational research, and clinical investigations. Topics of interest include molecular and cellular mechanisms of tumor initiation, progression, and metastasis; innovations in imaging and diagnostic methods; advances in surgical, systemic, and targeted therapies; and the integration of immunotherapy and precision medicine. Submissions that bridge fundamental research and clinical application are particularly encouraged, with the goal of improving outcomes for patients with these challenging malignancies.

## About the Journal

### Message from the Editor-in-Chief

*Cancers* (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
