Special Issue

Advances in Pancreatic Cancer: Exploring Biomarkers and Prognostic Predictors

Message from the Guest Editor

With our Special Issue, titled "Advances in Pancreatic Cancer: Exploring Biomarkers and Prognostic Predictors", we hope to shape the future of pancreatic cancer care and strive towards improved patient outcomes. For this Special Issue, we invite submissions on cutting-edge research in the field of pancreatic cancer diagnosis and prognosis, thereby contributing to advancements that will ultimately enhance patient prognosis. Topics of interest include the following: novel biomarkers (liquid biopsy, proteomics, metabolomics, etc.); established and emerging prognostic factors (tumor microenvironment, genetic alterations, and inflammatory markers); and their clinical implications for early detection, risk stratification, and personalized management. Submissions in forms of original research articles, reviews, and perspectives are welcome. Please submit your manuscripts by June 2026, so we collectively work toward a brighter future for pancreatic cancer patients.

Guest Editor

Dr. Makoto Abue

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief
