Medical Image-Based Cervical Cancer Prevention, Diagnosis and Treatments

Message from the Guest Editors

Cervical cancer prevention, diagnosis, and treatment have significantly evolved with advancements in medical imaging and technology. From the use of three-dimensional imaging to assess cancer extent and the employment of soft tissue imaging in conjunction with clinical findings to improve the detection of cancer to treatment planning and follow up to assess cancer response, the integration of medical imaging not only aids in accurate diagnosis and treatment monitoring to enable the timely detection of recurrence, it also plays a pivotal role in treatment planning for increased accuracy and assists in management decision making, resulting in improvements in patient outcomes and a reduction in treatment-related toxicity.

Guest Editors

Dr. Emma R. Allanson

Department of Gynecological Oncology, King Edward Memorial Hospital for Women, Perth, Australia

Dr. Ming Yin Lin

Peter Maccallum Cancer Centre, Melbourne, Australia

Deadline for manuscript submissions

30 September 2026

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
