Minimally Invasive Gastric Cancer Surgery

Message from the Guest Editors

Stomach cancer remains a neoplasm with both a high incidence and high mortality. Surgical therapy is an integral part of therapeutics, indispensable in the perspective of a potentially curative course. Gastrectomy combined with lymphadenectomy is a complex intervention, burdened with high morbidity and mortality; however, even in this field, minimally invasive surgical strategies have been developed in recent years, which have helped to standardize the surgical act by setting major morbidity and mortality rates to benchmark values. This Special Issue intends to provide an update of the minimally invasive approach to radical gastrectomy for cancer, comparing techniques and outcomes from East and West; a relevant space will also be reserved for emerging technologies such as fluorescence-guided surgery, robotic surgery, intraoperative integrated treatments with endoscopy, and intraperitoneal chemotherapy.

Guest Editors

Prof. Dr. Gian Luca Baiocchi

Prof. Dr. Simone Giacomuzzi

Dr. Felix Berlth

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
