Wnt Pathway Targets in Cancer

Message from the Guest Editors

Dysregulation of Wnt signaling is known to be associated with various cancers. As such, identification of novel Wnt pathway targets in cancer and better characterization of already-known targets present exciting, emerging opportunities for cancer treatment and perhaps even prevention. In this Special Issue, we propose to cover Wnt pathway targets in cancer, with a focus on solid tumors, especially highly lethal cancers of the liver (e.g., HCC), pancreas (e.g., PDAC), and GI tract. Topics may include but are not limited to the role(s) of Wnt pathway targets in cancer stem cells, nonparenchymal cells, cancer metabolism, tumor immune response, and tumor microenvironment. Original research articles, review articles, as well as short communications are invited for this Special Issue. We look forward to receiving your contributions.

Dr. Terence K.W. Lee

Guest Editors

Dr. Keane Lai

Prof. Dr. Terence Kin Wah Lee

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
