Updates on Liver Cancer Management

Message from the Guest Editor

Hepatocellular carcinoma (HCC) remains a significant global health burden due to its high incidence and mortality. Over the past few decades, significant progress has been achieved in the management of HCC, with advanced surgeries, including minimally invasive and robot-assisted procedures, liver transplantation, and local ablation therapy potentially offering a cure. Trans-arterial treatment techniques and radiation therapies are being developed further, while the recent introduction of immunotherapy opened a new systemic treatment landscape. The introduction of several classification system for HCC (such as BCLC), clearly defining patient groups and assigning reasonable treatment options, has standardized treatment. Currently, a comprehensive and multidisciplinary approach is crucial for the effective management of this disease. In this SI on **“Updates on Liver Cancer Management”** (including metastatic cancers), a comprehensive overview of the evolving management landscape and challenges to its improvements will be provided.

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
