T Cells in Hematologic Malignancies: Biology, Microenvironment, and Therapeutic Advances

Message from the Guest Editor

We are pleased to invite you to contribute to this Special Issue, *"T Cells in Hematologic Malignancies: Biology, Microenvironment, and Therapeutic Advances."* T cells are key regulators of immune surveillance and therapeutic response in hematologic malignancies. The clinical success of CAR-T cell therapies and bispecific T cell engagers has transformed the management of lymphoid malignancies and multiple myeloma, while revealing new challenges in understanding T cell biology within the unique bone marrow and lymphoid microenvironments. Emerging insights also point to important roles for T cells in myeloid neoplasms such as acute myeloid leukemia and myelodysplastic syndromes. This Special Issue will highlight advances spanning basic mechanisms to translational and clinical applications. It welcomes original research and reviews on T cell biology, microenvironmental interactions, therapeutic innovation, and mechanisms of resistance. We look forward to receiving your contributions and to advancing the field together.

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
