Emerging Biomarkers and Molecular Characterization of Renal Cancers

Message from the Guest Editors

Molecular characterizations and immunohistochemistry of renal tumors have evolved significantly within the last decade. Advances in this field continue to allow us to classify previously unclassified renal tumors and improve several previous classifications. While tumor morphology remains the main driver of treatment, clinical trials are increasingly taking molecular signature into account. Data from these trials allow for further clinicopathological correlation, highlighting groups of patients who may benefit from personalized therapy. This Special Issue will bring together studies on biomarkers, molecular findings, and related diagnostic approaches of renal tumors. In addition, we welcome studies with future perspective approaches involving novel technology, such as artificial intelligence and machine learning.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
