

Special Issue

Breast Cancer: Immune Response, Immune Microenvironment, and Immunotherapy

Message from the Guest Editors

This Special Issue will explore the diverse mechanisms of resistance in breast cancer immunotherapy, with a particular focus on the pivotal role of patient stratification based on immune profiles. By categorizing patients according to distinct immunological characteristics, this Special Issue will deepen our understanding of how these classifications influence therapeutic outcomes. Furthermore, it will synthesize current evidence linking immune-based patient subgroups to differential treatment responses, ultimately advocating for biomarker-driven strategies that enhance the precision and effectiveness of personalized immunotherapy in breast cancer.

Guest Editors

Dr. Ravindra Deshpande

Department of Cancer Biology, Wake Forest School of Medicine,
Winston Salem, NC, USA

Prof. Dr. Ann Richmond

Vanderbilt University Medical Center, 432-B Preston Building, Nashville,

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
