

Special Issue

Advances in Systemic Therapy and Radiotherapy for the Treatment of Lung Cancer

Message from the Guest Editor

Lung cancer remains a formidable global health challenge, but recent advancements in both radiation and systemic therapy have redefined its management landscape. This Special Issue serves as a testament to the relentless pursuit of improved treatment strategies. In the realm of radiation therapy, innovations in precision and targeted delivery have revolutionized our ability to obliterate tumor cells while sparing healthy tissue. Simultaneously, systemic therapies have witnessed groundbreaking developments, with the emergence of immunotherapies and targeted therapies as well as the refinement of traditional chemotherapy regimens. These strides reflect a paradigm shift in lung cancer care, offering patients more tailored and effective options, prolonging survival, and enhancing the quality of life. This Issue delves into the promising breakthroughs, current challenges, and future directions at the intersection of radiation and systemic therapies in lung cancer management.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
