Special Issue

The Role of Radiotherapy, Immunotherapy and New Surgical Techniques in the Treatment of Lung Neoplasms

Message from the Guest Editor

Radiotherapy, immunotherapy, and new surgical techniques can be used to explore the evolving landscape of lung cancer treatment. This Special Issue delves into the pivotal roles of radiotherapy, immunotherapy, and cutting-edge surgical approaches in managing lung neoplasms. This publication highlights how these modalities, deployed individually and in combination, are revolutionizing patient care and improving outcomes in the battle against this formidable disease. This SI will emphasize the advancements in each field and their role in enhancing the overall therapeutic landscape for patients with lung neoplasms.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok.

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
