

## Special Issue

# The Role of Radiotherapy, Immunotherapy and New Surgical Techniques in the Treatment of Lung Neoplasms

### Message from the Guest Editor

Radiotherapy, immunotherapy, and new surgical techniques can be used to explore the evolving landscape of lung cancer treatment. This Special Issue delves into the pivotal roles of radiotherapy, immunotherapy, and cutting-edge surgical approaches in managing lung neoplasms. This publication highlights how these modalities, deployed individually and in combination, are revolutionizing patient care and improving outcomes in the battle against this formidable disease. This SI will emphasize the advancements in each field and their role in enhancing the overall therapeutic landscape for patients with lung neoplasms.

## About the Journal

### Message from the Editor-in-Chief

*Cancers* (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.
