Special Issue

The Clinical Trials and Management of Acute Myeloid Leukemia

Message from the Guest Editor

Acute myeloid leukemia (AML) has always posed a therapeutic challenge due to its molecular and cytogenetic complexity. For the first time in decades, advances in treatment through the approval of novel agents and combinations, have been made. Long-term disease-free survival had plateaued at less than 30% at 5 years; however, in the last few years, a small, but steady increase has been seen thanks to the advancements in novel therapies. The exploration of novel mechanisms and immune system enhancement as therapeutic targets for the treatment of AML continues. This Special Issue will highlight the clinical trials and advances in supportive care for acute myeloid leukemia.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok.

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
