

## Topical Collection

# The Development of Anti-cancer Agents

### Message from the Collection Editor

This Special Issue will highlight some key advances in the development of various types of therapeutic agents in cancer from monoclonal antibody-based drugs, to small-molecule tyrosine kinase inhibitors, drugs-targeting hormone-dependent tumors, cell-cycle inhibitors, and the CAR-T cells. The outstanding challenges and future opportunities for the discovery of novel therapeutic targets and the development of more effective therapeutic agents will also be highlighted.

## About the Journal

### Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.
