

## Special Issue

# Recent Advances in the Pathogenesis of B Cell Malignancies

### Message from the Guest Editor

Recent advances in our understanding of the biology of malignant B cell lymphomas are already beginning to revolutionise the way in which patients are treated, providing new targeted therapies that increase survival and highlighting new opportunities for stratification. This Special Issue focuses on these cutting-edge advances in basic biology that are fuelling our changing understanding of the pathogenesis of these tumours. We are happy to consider reviews and original articles focused on exploring the fundamental biology of B cell lymphomas.

## About the Journal

### Message from the Editor-in-Chief

*Cancers* (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
