Circulating miRNAs as Tumor Biomarkers

Message from the Guest Editor

miRNAs are short non-coding RNA molecules that regulate mRNA expression post-transcriptionally. These molecules are being excreted extracellularly and detected in many types of body fluids, such as blood, urine, etc. The presence of circulating miRNAs in peripheral blood in a highly stable manner has positioned them as promising noninvasive new biomarkers for a wide range of diagnostic applications. Their role has been studied extensively mainly on diagnosis, prognosis, and resistance to therapy for several types of human cancers. This Special Issue will highlight the clinical importance of circulating miRNAs as biomarkers, the effects of various preanalytical and analytical parameters on their measurements, as well as technological advances that will further improve our knowledge in the field of early diagnosis and detection of minimal residual disease.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
