

## Special Issue

# Environmental Carcinogens and Cancer Risk

### Message from the Guest Editor

Environmental carcinogens encompass a broad range of chemical, biological, and physical agents as well as some lifestyle factors. A unifying characteristic of these agents is the involuntary nature of their exposure from environmental and occupational settings. Certain populations are at higher risk of being exposed to environmental carcinogens by virtue of occupations involving use of cancer-causing agents or residences in proximity to sources of environmental contaminants. Pregnant women, infants, and children comprise vulnerable populations to effects of environmental carcinogens, and disparities exist by socioeconomic status, as persons of low income may be less able to modify their environmental circumstances.

## About the Journal

### Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
