

## Special Issue

# Integrins and Tumor Microenvironment, New Perspectives in Targeted Treatments

### Message from the Guest Editors

Integrins are a family of cell surface receptors with a longstanding history in cancer. The integrin-mediated binding of extracellular matrix components (ECM) by cancer cells leads to essential signaling for cancer cell survival, proliferation, migration, extravasation, and metastatic dissemination to secondary organs. Indeed, integrins are expressed not only on cancer cells, but also on stromal cells, such as endothelial cells and cancer-associated fibroblasts (CAFs), and on host immune cells, such as tumor-associated macrophages (TAMs) and tumor-infiltrating lymphocytes (TILs). Thus, the aim of this issue is to unravel the role of integrins in cancer-TME crosstalk, exploring novel molecular pathways by which integrins might promote cancer progression and resistance to anticancer therapy, and suggesting innovative targets for therapeutic interventions. We solicit contributions on all topics connected to this area, including, but not limited to:

- Integrins in cancer cell – TME interactions driving drug resistance
- Integrins in cancer immune evasion strategies
- Development of antibody/small-molecule–drug conjugates
- Integrins as tools for molecular imaging

### Guest Editors

Dr. Francesca Bianchini

Experimental Pathology and Oncology Section of the Department of Clinical and Experimental Biomedical Sciences, University of Florence, Viale GB Morgagni 50, 50134 Firenze, Italy

Dr. Andrea Trabocchi

Department of Chemistry “Ugo Schiff”, University of Florence, 50019 Sesto Fiorentino, Italy

### Deadline for manuscript submissions

closed (31 December 2024)

## About the Journal

### Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

### Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
