Tumor Immune Microenvironment in Lymphoproliferative Syndromes

Message from the Guest Editors

Lymphoproliferative syndromes constitute an extensive and heterogeneous group of oncological diseases with different features, biological behavior, and clinical evolution. The precise molecular characterization of lymphomas is gaining in interest and relevance, as it may represent the first step in the design a successful therapeutic strategy to keep disease under control. However, the complexity of lymphomas goes beyond the molecular abnormalities of malignant lymphocytes. The specific surrounding tumor microenvironment (TME) has been revealed as a factor of paramount relevance, that in some cases harbors prognostic and predictive information which can be crucial from a clinical perspective, as the availability of different types of immunotherapies has dramatically increased in the last few years. In this Special Issue, reputed basic and clinical experts in the lymphoma field will try to thoroughly describe the specific immune TME in these diseases, from different angles, in order to identify potential new therapeutic targets that could ameliorate clinical outcomes in patients with lymphoproliferative syndromes.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
