Melanoma: Prevention and Molecular Epidemiology

Message from the Guest Editor

Melanoma is a complex immunogenic disease. Incidence is rising among developed countries, but mortality has begun to plateau and even decrease. The extent to which this is due to current immunotherapies is not yet clear, as the decrease became evident before the widespread use of these therapies. It is critical to clearly understand the biology of melanoma in order to curb its increase and to continue the decline in mortality. To assist ongoing research efforts, we present the most up-to-date information on prevention and the molecular epidemiology of melanoma.

Guest Editor

Prof. Dr. Marianne Berwick

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
