Metastasis and Tumor Cell Migration of Solid Tumors

Message from the Guest Editors

The developmental process of local and distant metastasis represents the major and defining trait of malignant tumors, whereby tumor cells sustain the capability to migrate from the initial tumor site, seed, and grow at a location other than that of the initial tumor. To date, nearly 90% of all tumor-related deaths are caused by tumor metastasis. Tumor cell migration and invasion are crucial prognostic factors for tumor treatment response and patients' five-year overall survival. The mechanisms of tumor cell migration and invasion are the focus of this Special Issue. This Special Issue will highlight the role of different aspects of the process of epithelial–mesenchymal transition, tumor–host interface interactions, tumor cell migration, and settlement of metastasis in solid tumor disease in order to improve our understanding of these complex interactions in human cancers.

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
