Neutrophils in Cancer: Role and Therapeutic Strategies

Message from the Guest Editors

The role of neutrophils in cancer and therapeutic strategies aimed at key features of neutrophil biology is now at the forefront of cancer research. Indeed, neutrophils have been described as playing both pro- and anti-tumor roles during cancer progression. They act locally and systemically, and high neutrophil levels in the tumor microenvironment and in circulation are consistently associated with poor survival in several cancer types. Moreover, neutrophils can impact the response of tumor cells to treatment including radiation, anti-angiogenic therapy, chemotherapy, and checkpoint inhibition. This Special Issue will discuss recent developments in our understanding of the biology of neutrophils in the context of cancer and will shed light on the importance of developing neutrophil targeting therapies. We aim to stimulate discussion by bringing together an international team of experts and new science from across the field in a Special Issue of *Cancers*.

Guest Editors

Dr. Jonathan D. Spicer

Assistant Professor of Surgery, McGill University, Montréal, QC, Canada

Dr. Roni Rayes

Translational Lung Oncology Research Manager, McGill University & the McGill University Health Center, Montréal, QC, Canada

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
