Topical Collection

Regulatory and Non-Coding RNAs in Cancer Epigenetic Mechanisms

Message from the Collection Editor

Over the years enormous progress has been made in our understanding of the way RNA controls and regulates processes in cells and organisms, and how these mechanisms—when they go awry—contribute to the progression of many diseases, including cancer. The regulatory and non-coding "RNA world" includes not only long non-coding RNAs (lncRNAs) and microRNAs (miRNAs) but also many more other types of RNAs (e.g., circular RNAs, enhancer RNAs) that are components of epigenetic regulatory mechanisms of development and cancer. The objective of this collection is to attract research studies and critical reviews on the central role of regulatory and non-coding RNAs in epigenetic mechanisms of cancer.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok
Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
