

## Special Issue

# Dissecting the Contribution of the Tumor Microenvironment to Pancreatic Cancer

### Message from the Guest Editor

Pancreatic ductal adenocarcinoma is a stroma-rich solid tumour arising from the exocrine compartment of the pancreatic gland. The proposed framework for the progression of the normal epithelium to pancreatic intraepithelial neoplasia (PanIN), which is a non-invasive neoplastic precursor to PDAC, is associated with a series of common histological and genetic alterations. Histological evaluation and staging remain the gold standard in defining the clinical characteristics of PDAC and are a strong prognostic factor. However, targetable drivers underlying phenotypic changes and tumour progression remain elusive. The current Special Issue invites contributions aimed at exploring the complex bi-directional conversations that occur between cancer cells and their microenvironment. These studies will not only build up our fundamental understanding of the biology of this disease, but will also reveal new therapeutic opportunities that may lead to improved patient outcomes.

## About the Journal

### Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
