

Special Issue

Pediatric/Adolescent Cancer and Exercise

Message from the Guest Editors

There is growing evidence for a protective association of regular physical activity and the risk of many prevalent adult cancers, and even of cancer-related outcomes—including mortality—once a tumor has developed. In the current millennium, a growing number of preclinical studies are providing insight into the mechanisms responsible for the antitumoral effects of exercise, particularly improved cancer immunosurveillance. This is quite an important finding because evading immune destruction is a hallmark of cancer and immunotherapy is reshaping cancer treatment. Yet, many questions remain open, especially with regard to the great forgotten, pediatric/adolescent cancer. This issue welcomes preclinical and clinical papers dealing with exercise effects in the entire pediatric/adolescent cancer control continuum.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
